Summary

Computer Science undergraduate at UP Manila and high-agency AI systems builder. Experienced in multimodal vision-language architectures, explainable AI attribution (thesis in GEO/XAI), and production full-stack systems. National Champion at L'Oréal Brandstorm 2026 (Global Finalist, top 0.035% worldwide) with peer-reviewed research published in IEEE IISA 2026.

Education

University of the Philippines Manila, BS in Computer Science - Manila, NCR — Expected 2026

- **Coursework:** Software Engineering, Web Programming, Databases, Computer Architecture
- **Activities:** UP Society of Computer Scientists, GDG on Campus UP Manila

Chonnam National University, MOVE-UP Student Exchange - South Korea — June 2024

- **Relevant Coursework:** Principles of Programming Languages, Design Engineering, Human-Computer Interaction
- **Activities/Achievements:** Engaged in extra-curricular international-related events, participated in team-building events held by the local government, and contributed to various initiatives organized by the university's Office of International Affairs

New Era University, STEM Strand - Quezon City, NCR — Aug 2021

- Graduated with honors

Experience

Affiliate Data Intern
L'Oréal Philippines
May 2026 – Aug 2026

- Ingested and consolidated **multi-channel sales and marketing datasets** for 4 major brand portfolios (L'Oréal Paris, Maybelline New York, Garnier, and Dr. G) using **Power Query** and **Power BI**, reducing manual data preparation time
- Engineered **automated ETL pipelines** and reporting workflows using **Power Automate** and **Advanced Excel (VBA)** to deliver real-time data visibility to stakeholders
- Developed **predictive data projection models** to forecast campaign performance and consumer demand trends, supporting strategic budget allocation for the CDMO

IT Service Management Intern
DFI Retail Groups
June 2025 – Dec 2025

- Developed and maintained enterprise software applications adhering to rigorous **Software Development Life Cycle (SDLC)** standards
- Ensured solutions satisfied stringent functional requirements across **system performance** and **data security**
- Planned, managed, and executed **software deployments** across **development, staging, and production** environments
- Delivered technical solutions for business-critical functions, including **role-based permissions** and catalogue operations

Contributor - Generalist (Tier 1)
Outlier
Aug 2024 – Dec 2025

- Ranked and evaluated **100+** AI-generated responses to a diverse range of user prompts, ensuring high-quality outputs
- Conducted fact-checking verification of AI responses, contributing to the improvement of system reliability

Academic Collaborations Officer
Google Developer Groups on Campus UP Manila
Sept 2024 - Sept 2025

- Facilitated cross-campus technical partnerships, coordinating joint initiatives across student and developer organizations
- Spearheaded collaborative engineering projects with university departments to expand student-developer outreach
- Designed and managed hands-on developer workshops, **technical hackathons**, and AI speaker series

General Manager
Project Axiom
Mar 2022 – Jul 2022

- Chaired and co-managed a Web3 DAO with **6,000+** members, facilitating decentralized governance and community engagement
- Developed financial opportunities and technological awareness initiatives to grow blockchain interest in the community
- Collaborated with other DAOs to foster Web3 engagement and education in the Filipino community
- Oversaw community events and initiatives to boost active participation and member collaboration
- Practiced productive communication and creative problem-solving in decentralized governance structures

Project Manager
Kalinga
Sep 2020 – Dec 2021

- Grew the organization's following to **2,000+** members through strategic content creation and community engagement
- Held project management seminar to train and equip members with essential skills for organizing and managing humanitarian projects effectively

Projects

L'Oréal Brandstorm 2026 - National Champions (Philippines)
2026

- Designed a comprehensive digital-physical fragrance ecosystem that secured **1st place (National Champions)** in the Philippines, flying to Paris, France to represent the nation at the **Global Finals**
- Recognized as one of only **135 global finalists** selected from over **380,000+ international participants**, representing the top **0.035%** of competitors worldwide
- Technologies Used: React, Groq, Mistral AI (Voxtral TTS), Node.js, TypeScript

MyNaga Health Suite: Digital Health Governance - Naga City Mayoral Hackathon
2026

- Spearheaded full-stack architecture, securing Grand Winner (Health) at the Naga City Hackathon by building a digital health ID and Guardian Mode for 155,000+ residents
- Engineered a 3-pronged AI system (smart triage, voice-to-form, guardian mode) with an accessible UI tailored for the elderly
- Streamlined City Health Office operations, reducing patient wait times by 3-5x and targeting medication adherence through proactive tracking
- Technologies Used: React, Node.js, Python, Supabase, Ollama, Tailwind CSS, HuggingFace, Groq, Netlify, PWA

ClaimCheck: Multimodal GEO & Explainable AI (XAI) Attribution Engine (Undergraduate Thesis)
2026

- Designed and developed a multi-agent pipeline integrating VLMs, Generative Engine Optimization (GEO), and Explainable AI (XAI) to verify citation grounding and mitigate hallucinations in AI-powered e-commerce search engines
- Evaluated text-only, vision-only, and hybrid VLM architectures on SQID dataset, elevating mean citation support rates from **47.2% to 65.4%** on average, and achieving a dominant **86.3%** with InternVL2
- Measured cross-modal semantic alignment and visual grounding robustness under adversarial perturbations across LLaVA-NeXT, InternVL2, and Qwen2-VL using Grad-CAM attention auditing
- Technologies Used: Python, PyTorch, HuggingFace, Gradio, Grad-CAM, LLaVA-NeXT, InternVL2, Qwen2-VL, SQID, LLM-as-a-Judge

Decoding SLE: Pathway-Grouped Explainable ML for Lupus Risk Prediction
2026

- Proposed and demonstrated a Pathway-Grouped Explainable Machine Learning framework to bridge the interpretability gap of individual SNP explanations in genomic susceptibility modeling
- Sourced genetic variants from the EBI GWAS Catalog, annotated SNPs to biological pathways, trained an XGBoost classifier achieving a test AUC-ROC of **0.812**, and aggregated TreeSHAP values to rank susceptibility pathways (MHC/Immune Presentation, Interferon Signaling, Complement System)
- Published as a peer-reviewed Full Paper in IEEE IISA 2026 (Track III: Applications - Healthcare); co-authored with Mikhail Madarang, Deshny Sahagon, and Geoffrey Solano
- Technologies Used: Python, XGBoost, TreeSHAP, Scikit-learn, GWAS Catalog API, Reactome/KEGG

AlarmZone: Mission-Based Smartwatch App (Zepp OS)
2026

- Commercial mission-based smart alarm app enforcing wakefulness through active challenges (shake detection, step goals, and mental math puzzles)
- Deployed across **106 countries** (1,800+ downloads); driving a **78.8% checkout rate** and **+160% QoQ sales growth** via multi-lingual ASO
- Engineered responsive UI on Zepp OS (TypeScript/QuickJS) scaling across round and square displays
- Technologies Used: Zepp OS (v3.0+ API), TypeScript, QuickJS, Jest, KiezelPay

GJeep: Modernizing Travel - GCash's ImaGnation Innovation Challenge 2025
2025

- Secured placement of Top 4 out of 196 teams in a nationwide 3-day hackathon by developing GJeep, a transport-targeted initiative to modernize the commute system in the Philippines using LTE and BLE for fare transaction
- Technologies Used: GCash's InnovLabs Sandbox, React, Firebase, TypeScript

Jot-it: AI-Powered Task Management
2025

- Full-stack AI-powered task management application leveraging natural language processing for task creation and intelligent scheduling with secure backend API key management, contextual assistance, and direct database operations
- Features JWT authentication, responsive design, task analytics, smart notifications, social collaboration, conversation persistence, and user context integration
- Technologies Used: React, TypeScript, Node.js, Express.js, PostgreSQL, Supabase, OpenRouter API, Cloudflare Workers, Tailwind CSS

Project: Tanda - AI-Powered Flashcard Generator
2025

- Developed a multimodal AI system for automated flashcard generation from PDF documents, integrating text processing, visual content analysis, and semantic retrieval
- Streamlined PDF to Anki AI/Transformer pipeline using FastAPI for reusability and ease-of-use
- Technologies Used: Python, FastAPI, PyMuPDF, PaddleOCR, ChromaDB, Ollama, OpenRouter, CLIP

UP Manila Building Information Management System
2025

- Developed campus management system as major Software Engineering requirement, implementing real-time request monitoring and inventory tracking
- Engineered administrative dashboards for facility storage upkeep, staff task management, and event scheduling
- Technologies Used: PHP, Laravel, Vue.js, Tailwind CSS, MySQL, JavaScript

Technical Skills

Programming Languages: TypeScript, JavaScript, Python, Dart, C, C++, Java, Haskell, PHP, HTML, CSS, SQL, Bash
Frontend Frameworks: React, Next.js, Vue.js, Vite, Tailwind CSS
Backend Frameworks: Node.js, Express.js, Laravel, PHP
Mobile Development: Flutter, Dart, Android Studio
Database Systems: PostgreSQL, MySQL, Supabase, Prisma
AI/ML Tools: TensorFlow, PyTorch, Huggingface, OpenRouter API, Streamlit
DevOps & Cloud: Docker, Kubernetes, Git, GitHub, Netlify, Vercel, Cloudflare Workers
Development Tools: VS Code, Postman, npm, ESLint, Prettier, Sentry, Selenium, BeautifulSoup, Jest, KiezelPay, n8n
