Summary

Eager Computer Science Student specializing in AI and Full-stack development. Experienced in optimizing AI models and building scalable applications. Proven track record in project management and community engagement with international exposure.

Education

University of the Philippines Manila, BS in Computer Science - Manila, NCR Expected 2026

- **Coursework:** Software Engineering, Web Programming, Databases, Computer Architecture
- **Activities:** UP Society of Computer Scientists, GDG on Campus UP Manila

Chonnam National University, MOVE-UP Student Exchange - South Korea June 2024

- **Relevant Coursework:** Principles of Programming Languages, Design Engineering, Human-Computer Interaction
- **Activities/Achievements:** Engaged in extra-curricular international-related events, participated in team-building events held by the local government, and contributed to various initiatives organized by the university's Office of International Affairs

New Era University, STEM Strand - Quezon City, NCR Aug 2021

- Graduated with honors

Experience

Affiliate Data Intern

L'Oréal Philippines

May 2026 – Aug 2026

- Ingested and consolidated **multi-channel sales and marketing datasets** for 4 major brand portfolios (L'Oréal Paris, Maybelline New York, Garnier, and Dr. G) using **Power Query** and **Power BI**, reducing manual data preparation time
- Engineered **automated ETL pipelines** and reporting workflows using **Power Automate** and **Advanced Excel (VBA)** to deliver real-time data visibility to stakeholders
- Developed **predictive data projection models** to forecast campaign performance and consumer demand trends, supporting strategic budget allocation for the CDMO

IT Service Management Intern

DFI Retail Groups

June 2025 – Dec 2025

- Developed and maintained software applications with the organization's Software Development Life Cycle (SDLC) standards
- Ensured all delivered solutions met all functional requirements, such as performance and security
- Planned, managed, and executed software deployments across development and production environments
- Communicated and provided user solutions to daily business functions, such as permissions access and catalogue maintenance

Contributor - Generalist (Tier 1)

Outlier

Aug 2024 – Dec 2025

- Ranked and evaluated **100+** AI-generated responses to a diverse range of user prompts, ensuring high-quality outputs
- Conducted fact-checking verification of AI responses, contributing to the improvement of system reliability

Academic Collaborations Officer

Google Developer Groups on Campus UP Manila

Sept 2024 - Sept 2025

- Facilitated partnership initiatives with campus organizations, building strong inter-club relationships
- Coordinated collaborative projects with university departments, enhancing student-developer outreach
- Designed and managed student/developer programs, workshops, hackathons, and speaker series

General Manager

Project Axiom

Mar 2022 – Jul 2022

- Chaired and co-managed a Web3 DAO with **6,000+** members, facilitating decentralized governance and community engagement
- Developed financial opportunities and technological awareness initiatives to grow blockchain interest in the community
- Collaborated with other DAOs to foster Web3 engagement and education in the Filipino community
- Oversaw community events and initiatives to boost active participation and member collaboration
- Practiced productive communication and creative problem-solving in decentralized governance structures

Project Manager

Kalinga

Sep 2020 – Dec 2021

- Grew the organization's following to **2,000+** members through strategic content creation and community engagement
- Held project management seminar to train and equip members with essential skills for organizing and managing humanitarian projects effectively

Projects

L'Oréal Brandstorm 2026 - National Champions (Philippines) 2026

- Designed a comprehensive digital-physical fragrance ecosystem that secured **1st place (National Champions)** in the Philippines, flying to Paris, France to represent the nation at the **Global Finals**
- Recognized as one of only **135 global finalists** selected from over **380,000+ international participants**, representing the top **0.035%** of competitors worldwide
- Technologies Used: React, Groq, Mistral AI (Voxtral TTS), Node.js, TypeScript

MyNaga Health Suite: Digital Health Governance - Naga City Mayoral Hackathon 🏆 2026

- Spearheaded full-stack architecture, securing Grand Winner (Health) at the Naga City Hackathon by building a digital health ID and Guardian Mode for 155,000+ residents
- Engineered a 3-pronged AI system (smart triage, voice-to-form, guardian mode) with an accessible UI tailored for the elderly
- Streamlined City Health Office operations, reducing patient wait times by 3-5x and targeting medication adherence through proactive tracking
- Technologies Used: React, Node.js, HuggingFace, Groq, Netlify, PWA

GJeep: Modernizing Travel - GCash's ImaGnation Innovation Challenge 2025 🏆

- Secured placement of Top 5 out of 196 teams in a nationwide 3-day hackathon by developing GJeep, a transport-targeted initiative to modernize the commute system in the Philippines using LTE and BLE for fare transaction
- Technologies Used: GCash's InnovLabs Sandbox, React, Firebase, TypeScript

Jot-it: AI-Powered Task Management 🏆 2025

- Full-stack AI-powered task management application leveraging natural language processing for task creation and intelligent scheduling with secure backend API key management, contextual assistance, and direct database operations
- Features JWT authentication, responsive design, task analytics, smart notifications, social collaboration, conversation persistence, and user context integration
- Technologies Used: React, TypeScript, Node.js, Express.js, PostgreSQL, Supabase, OpenRouter API, Cloudflare Workers, Tailwind CSS

Project: Tanda - AI-Powered Flashcard Generator 2025

- Developed a multimodal AI system for automated flashcard generation from PDF documents, integrating text processing, visual content analysis, and semantic retrieval
- Streamlined PDF to Anki AI/Transformer pipeline using FastAPI for reusability and ease-of-use
- Technologies Used: Python, FastAPI, PyMuPDF, PaddleOCR, ChromaDB, Ollama, OpenRouter, CLIP

UP Manila Building Information Management System 2025

- Developed as major Software Engineering course requirement; served as full-stack developer implementing real-time dashboard for request monitoring, report generation system, and university-wide inventory tracking
- Implemented real-time dashboard for request monitoring, report generation system, and university-wide inventory tracking in terms of building storage, inventory upkeep, staff

Technical Skills

Programming Languages: TypeScript, JavaScript, Python, Dart, C, C++, Java, Haskell, PHP, HTML, CSS, SQL, Bash

Frontend Frameworks & Libraries: React, Next.js, Vue.js, Vite, Tailwind CSS

Backend Frameworks: Node.js, Express.js, Laravel, PHP

Mobile Development: Flutter, Dart, Android Studio

Database Systems: PostgreSQL, MySQL, Supabase, Prisma

AI/ML Tools: TensorFlow, PyTorch, Huggingface, Ollama, OpenRouter API, Streamlit

DevOps & Cloud: Docker, Kubernetes, Git, GitHub, Netlify, Vercel, Cloudflare Workers

Development Tools: VS Code, Postman, npm, ESLint, Prettier, Sentry, Selenium, BeautifulSoup, n8n

management, and event scheduling

- Technologies Used: PHP, Laravel, Vue.js, Tailwind CSS, MySQL, JavaScript

OpenNutriTracker (Fork) 🏆 2025

- Enhanced fork of open-source mobile nutrition tracking app with AI-powered chat functionality for nutrition assistance; built following Clean Architecture principles with BLoC pattern for state management
- Key enhancements include dynamic calorie calculation, smart calendar visualization, JSON-based function calling for AI integration, debug mode, and robust error handling with local data encryption
- Technologies Used: Flutter, Dart, Supabase, OpenRouter API, Food Data Central API, BLoC pattern, Sentry

SeekUp: ARAL (Accessible Routes to Achieve Learning) 2024

- Developed pitch of end-to-end platform that seamlessly connects learners with curated educational resources, personalized mentorship, and hands-on real-world application opportunities; engineered and launched as part of a collaborative 3-day Hooked Unitour Hackathon to promote accessible, impactful learning experiences.
- Served as backend developer and co-presented project in final hackathon presentation
- Technologies Used: React, HTML, CSS, Internet Computer Protocol

RAG-Enhanced Cold Email Generator 🏆 2024

- Personal side-project exploring local LLM capabilities through Retrieval Augmented Generation (RAG) system that generates personalized cold emails by retrieving information from user resume and company data
- Handled all development aspects from web scraping with BeautifulSoup to browser automation with Selenium and integrating Ollama model for email generation with native Gmail integration
- Technologies Used: Python, Ollama, Selenium, BeautifulSoup

Machine Learning Analysis of Global Student Mobility 🏆 2024

- Personal side-project combining interest in international education trends with data science; includes full data science workflow from data cleaning and exploratory data analysis (EDA) to machine learning
- Implemented unsupervised learning (clustering) to identify country profiles and supervised learning (classification) to predict mobility rates based on economic indicators
- Interactive web app deployed with Streamlit allowing user exploration of data and model results
- Technologies Used: Python, Streamlit, Kaggle Datasets
