Summary

Computer Science undergraduate at UP Manila with proven technical execution across peer-reviewed AI research, enterprise data systems, and competitive engineering. Placed 1st Nationally at L’Oréal Brandstorm 2026 (Global Finalist, top 0.035% worldwide), and Grand Winner at the Naga City Mayoral Hackathon. Author of an accepted paper at IEEE IISA 2026 on explainable ML for genomics. A high-agency builder passionate about shipping tools and practical intelligence that solve tangible everyday problems.

Education

University of the Philippines Manila , BS in Computer Science - Manila, NCR	Expected 2026
Relevant Coursework: Software Engineering, Web Programming, Database Systems, Computer Architecture Activities: UP Society of Computer Scientists, Google Developer Groups on Campus UP Manila	
Chonnam National University , MOVE-UP Outbound Student Exchange - South Korea	June 2024
Relevant Coursework: Principles of Programming Languages, Design Engineering, Human-Computer Interaction Activities: Engaged in international exchange programs and university global initiatives	
New Era University , STEM Strand - Quezon City, NCR (Graduated with honors)	Aug 2021

Experience

Affiliate Data Intern - CPD CDMO , L’Oréal Philippines - Mandaluyong City	May 2026 – Aug 2026
- Ingested and consolidated multi-channel sales and marketing datasets for 4 major brand portfolios (L’Oréal Paris, Maybelline New York, Garnier, and Dr. G) using Power Query and Power BI - Engineered automated ETL pipelines and predictive data projection models using Power Automate and Advanced Excel (VBA) to optimize marketing budget allocation	
IT Service Management Intern , DFI Retail Groups - Mandaluyong City	June 2025 – Dec 2025
- Developed and maintained enterprise software applications adhering to rigorous SDLC and security standards - Ensured solutions satisfied stringent functional requirements across system performance and data security - Planned, managed, and executed software deployments across development, staging, and production environments	
Contributor - Generalist (Tier 1) , Outlier - Remote	Aug 2024 – Dec 2025
- Ranked and evaluated 100+ AI-generated responses to diverse prompts, ensuring alignment with human preferences - Conducted fact-checking verification of model outputs to diagnose and mitigate system hallucinations	

Projects

L’Oréal Brandstorm 2026 - National Champions (Philippines) 🔗	2026
- Designed digital-physical fragrance ecosystem securing 1st Place Nationally (Top 135 Global Finalists out of 380k+ competitors) - Prototyped interactive conversational agent interface with real-time streaming inference and state persistence Technologies Used: React, TypeScript, Node.js, Groq, Mistral AI (Voxtral TTS), Tailwind CSS	
AlarmZone: Mission-Based Smartwatch App (Zepp OS) 🔗	2026
- Engineered mission-based smartwatch app on Zepp OS (TypeScript) across display form factors with accelerometer sensors - Published across 106 countries (1,800+ downloads), driving a 78.8% checkout rate and +160% QoQ sales growth Technologies Used: Zepp OS (QuickJS), TypeScript, Jest, KiezelPay Payment Gateway, ASO	
MyNaga Health Suite: Health Governance - Naga City Mayoral Hackathon 🔗	2026
- Spearheaded full-stack architecture, securing Grand Winner (Health) at the 1st Naga City Hackathon for 155k+ residents - Engineered 3-pronged platform (smart triage, voice-to-form, guardian mode) reducing clinic wait times 3–5x Technologies Used: React, Node.js, HuggingFace, Groq, Netlify, PWA, RESTful APIs	
ClaimCheck: Multimodal GEO & Explainable AI (XAI) Attribution Engine	2026
- Designed multi-agent VLM pipeline mitigating hallucinations; elevated citation support from 47.2% to 86.3% (InternVL2) - Audited attention maps via Grad-CAM; derived formal Attribution Grounding Scores over cross-attention layers Technologies Used: Python, PyTorch, Grad-CAM, InternVL2, Qwen2-VL, LLM-as-Judge	
Decoding SLE: Pathway-Grouped Explainable ML for Lupus Risk Prediction	2026
- Engineered genomic explainability framework using XGBoost and TreeSHAP, achieving test AUC-ROC of 0.812 - Accepted as Full Paper at IEEE IISA 2026; aggregated variant SHAP values to rank top driving immune pathways Technologies Used: Python, XGBoost, TreeSHAP, Scikit-learn, GWAS APIs, Biopython	

Technical Skills

Programming Languages: TypeScript, JavaScript, Python, Dart, C, C++, Java, PHP, HTML, CSS, SQL, Bash
Full-Stack & Frameworks: React, Next.js, Node.js, Express.js, FastAPI, Zepp OS (QuickJS), Vue.js, Laravel, Tailwind CSS
AI & Machine Learning: PyTorch, TensorFlow, HuggingFace, Multimodal VLMs, Autonomous Agents, Prompt Engineering, RAG, Ollama, Grad-CAM, TreeSHAP
Cloud, DevOps & Databases: Docker, Kubernetes, Git, GitHub, Supabase, PostgreSQL, MySQL, Cloudflare Workers, CI/CD
Development Tools & Methodologies: VS Code, Postman, npm, ESLint, Prettier, Jest, KiezelPay, Agile/Scrum, Demo-Driven Prototyping
